pastoren1@udayton.edu | (330) 614-0414 | linkedin.com/in/nolanpastore | nolanpastore.com | github.com/nolanpastore

EDUCATION | University of Dayton, Dayton, OH |

Bachelor of Science in Computer Information Systems

Bachelor of Arts in Communication Management

Expected Graduation May 2028

SKILLS: Java (8+ Years), Python (4+ Years), Copilot Agent Builder, Power Automate, PowerBI, Jira, Communication

WORK EXPERIENCE

INTERN CONTRACTOR (SWE – TECHNOLOGY STRATEGY) | PNC Bank, Remote 08/2026 – 05/2027

- Built executive PowerPoint decks to communicate technology initiatives to leadership
- Extracted and structured SharePoint data to design Power BI dashboards for strategic reporting
- Collaborated with cross-functional teams to align technology projects with business priorities

TECHNOLOGY INTERN (SWE – DATA AND AUTOMATION) | PNC Bank, Pittsburgh, PA 06/2026 – 08/2026

- Built a Microsoft Copilot AI assistant to streamline data analysis and project work
- Designed automated workflows with Power Automate, reducing manual effort across operational processes
- Built Power BI dashboards to transform business data into actionable insights for stakeholders

TECHNICAL SUPPORT REPRESENTATIVE | UDiT, University of Dayton, Dayton, OH 03/2025 – Present

- Facilitate in-person technology help desk and call center to support students and faculty with technical issues
- Communicate technical concepts to less experienced individuals whether in person or over the phone
- Gain hands-on experience with Dell hardware and Windows software

STUDENT AMBASSADOR | Strategic Enrollment Management, University of Dayton, Dayton, OH 08/2025 – Present

- Lead campus tours for prospective students and families, sharing personal experiences at UD
- Answer questions and create a welcoming environment for visitors that is reflective of school values
- Support admission events and represent UD with professionalism and enthusiasm

PROJECT EXPERIENCE

PERSONAL PORTFOLIO WEBSITE [nolanpastore.com] | Personal Project 06/2026 – 07/2026

- Designed and built a personal portfolio website from scratch using Next.js, TypeScript, and Tailwind CSS
- Implemented scroll-reveal animations, a typewriter hero, and anchor-linked navigation
- Built a fully responsive design with alternating section layouts across devices

CAN RECYCLER MACHINE | Personal Project 10/2024 – 11/2025

- Collaborated with engineering students to design and build an Arduino-controlled can recycler
- Developed C++ code to detect can with ultrasonic sensor, crush the can to 1.5 inches, and dispose of the can
- Utilized 3D printing and modeling with Bambu Lab for branding, can guidance, and the crushing mechanism

NFL STATS ANALYSIS PROGRAM | University of Dayton, Dayton, OH 11/2024

- Collaborated with partner on a VSCode Python program that analyzes NFL team performance using CSV datasets
- Extracts key statistics from 2003-2023 seasons (win/loss ratio, overall TDs, etc) with Pandas for trend analysis
- Generates team-specific and league-wide performance graphs using Matplotlib and Seaborn

MATCHMAKER PROGRAM | Lake High School, Uniontown, OH 12/2023 – 02/2024

- Developed a Java program with two functions: Assessment and Matchmaker
- Assessment gathers user preferences in a partner and determines the Myers-Briggs personality type
- Matchmaker ranks top matches from previous program users, using a compatibility scoring system out of 100
